LOOKING AT THE BRIGHT SIDE.—Here is a letter from a wife in Massachusetts to her husband in California. She don't intend going through the world with the blues:—"My dear husband: As it is now some time since you left for California, I suppose that you would be glad to hear how we are getting along in your absence. I am happy to say that we are enjoying very good health on the whole. Just at present two of the boys have got the small-pox. Amanda Jane has got the typhus fever, Betsey is down with the measles. Samuel got hooked by a cow the other day, and little Peter has just chopped off three of his fingers with a hatchet. It is a mercy he didn't chop them all off. With these trifling exceptions we are all well, and getting along nicely. You needn't be at all anxious about us. I almost forgot to say that Sarah Matilda eloped last week with a tin-pedlar. Poor girl! She's been waiting for the last ten years for a chance, and I'm glad she's married at last. She needn't have taken the trouble to elope, though, for I am sure I was glad enough to have her go. She was a great eater, and I find baked beans don't go off near so fast as they did. The way that girl would dig into pork and beans was a caution to the rest of the family. The cow took it into her head yesterday to run away; which was very unfortunate, to be sure, for the barn caught fire last night and was consumed. I was in hopes that the house would go, too, for it's very inconvenient; but the wind was the wrong way so it didn't receive much injury. Some boys broke into the orchard the other day, and stripped all the fruit trees. I am very glad of it, for if they hadn't, I presume the children would have made themselves ill by eating too much fruit. Hoping you enjoy yourself in California as well as we do at home, I remain your affectionate wife."

GREAT GUN STORIES.—A paragraph has been copied by many of our cotemporaries, in which it is stated that a Dahlgren gun at Point Comfort throws a shot six miles, striking at that distance a target the size of a man, nineteen times out of twenty. This *canard*, for it is nothing else, has furnished material for more than one elaborate article, and one journal in particular took the pains to say that the statement was not far from the truth, and should a naval war take place steam power and rifled cannon would necessarily render it of short duration.

It is a pity sometimes to spoil a good story, but that relating to the Dahlgren gun was altogether too good to be credited by any one possessing a knowledge of the present state of gunnery. The French, it is said, have been making experiments with rifled cannon, but the results are kept secret. Some credulous journals state that during these experiments, balls have been thrown with accuracy *ten* miles.—The Armstrong gun, which has been purchased by the British Government, is said to carry *eight* miles. Although the Government has endeavored to preserve secrecy regarding this gun, a description of it has been given, but it is not stated how far it will carry. Nothing positive, therefore, is known as to the distance the English or French guns will carry.

Now the greatest distance a shot has been thrown in this country is 3½ miles. This was thrown from a 12-inch gun, a charge of 25 pounds of powder being used, and the shot weighing 180 pounds. As to the accuracy with which a shot can be thrown, a Mr. Sawyer has struck a target 10 feet by 20, at the distance of a mile, about every other time.—The gun he used was a long 9 pounder rifle, and the shot was covered with lead and had six flanches or projections to fit into the grooves. From these statements it will be seen how much truth there is in the Dahlgren *canard*.—*N. Y. Courier.*

COSTLY STREET SWEEPERS.—Mr. Genio C. Scott, the man milliner of New York, states that the sidewalks of Broadway are still swept day and evening with a hundred thousand yards of costly silks. He remarks that the better the quality of silks the better sweeper it makes—moire antique being found to be much better than taffetas and foulards de soie. These sweeping machines though rather costly, are, like their masters, very *simple*, being merely, says Scott, thirty yards of eight-dollar silk, mounted on a reticulated frame of whalebone and silk.

DEATH OF DR. ALCOTT.—Dr. William A. Alcott, the eminent author and physician, died at his residence in Auburndale, Newton, at 11 o'clock on Tuesday. Deceased was widely known as the author of many valuable works on physiology and hygiene, which have had a large circulation. He was a native of Connecticut. He was a strict vegetarian in his diet, and to this fact is attributed the prolongation of a life which hung upon an enfeebled constitution.

SINGULAR EFFECT OF GRAVITATION.—Contrary to the established notion, the laws of gravitation are not fixed. On one of the ferry-boats, the other day, a shock to the boat sent a young girl flying into the arms of a handsome gentleman, and drove another young lady in exactly the opposite direction, so as to avoid an embrace from one of the "deck hands."

A LOVER OF PEACE MARRYING A DUMB WOMAN.—A man named Galt, in Cincinnati recently married a mute, and some curiosity was excited by the fact of his marrying a woman who could not speak, and a constable asked him the cause of his doing so. Galt answered that he had had two wives already, and that they gave him no rest by reason of their talking ceaselessly, and complaining and scolding from morning till night. Both had died, and now, as he was forty years old, desirous of having a little peace for the remainder of his life, he had determined to select a dumb woman.

THE CHANGE IN CALIFORNIA.—Old Californians love to talk of the days of 1849, but we doubt whether San Francisco was at its apogee of vice, pleasure, dissipation, etc., before or after the years 1851 and 1852. Business was at its liveliest point; those were the days of the "flour kings," when Friedland held the sceptre by reason of that extraordinary rise which put flour up to fifty dollars per barrel, making fortunes for a few and ruin and misery for many. The days when gambling was a recognized law were halcyon times for adventurers from every part of the globe. There were streets in San Francisco which were literally musical with the chink of money; the orchestral music, the sound of decanters and glasses, the noise of oaths and obscenity, rose and fell, sometimes ceasing for a few moments; but the coin rang monotonously and equally from one P. M. until four, five, and six in the morning. Such gambling probably never was known in any city, ancient or modern. The gambling halls were the lounging places of business men—staid, sober citizens, who now attend to buying and selling, law making and

church going with a proper honesty and regularity. The memorable poker games, where $25,000 was the 'ante; the "slugs" of fifty dollars' worth of gold were the counters, and a pack of cards changed at every deal, cost a mint drop of dollars' value!

Real estate in the metropolis was better than the richest claim up country; one merchant, and a Boston one too, if we remember right, rented a little corner store for $1500 per month, and sent the whole to his wife for pin money. The clubs were not organized then, there was but little good female society, although plenty that was not good, and a bachelor's life in California was hardly beyond reproach. Washing bills were fabulous—a starched shirt collar required an outlay of a dollar and a half, and clean pocket handkerchiefs were proportionately expensive. Things have changed in California since then. The artificial has given place to the natural and solid, sober prosperity distinguishes the State. It is progressing in everything; it is drawing now upon its own resources—a sure source of wealth.—*Boston Post.*

THE RUMORED INVASION OF CUBA.—Reference has been lately made to rumors of another fillibuster invasion of Cuba. These reports have been denied; but still there seems to be much of circumstantial directness in the allegations. The Courier des Etats Unis announces the existence of a secret fillibustering organization preparing an expedition on a large scale the object of which is the capture of Cuba.—Of this fact it says, it has been accidentally informed, but it is positive as to what it asserts. Arms and ammunition have been provided, and the men are ready to depart simultaneously from different parts of the Union.—The points of embarkation have been fixed and secret agents on the island of Cuba are engaged to prepare for the fillibusters a facile access. The headquarters of the enterprise are in New York. In New York are the chiefs of the expedition, and the funds that have been procured and from New York they issue their directions. The principal materials however, are stored in Southern cities,—and it is said that "the realization of this project is imminent."

We have no doubt there may be men foolish and reckless enough to make another invasion of Cuba; and that they may have made some arrangements for an expedition at the present time. But the attempt will scarcely be made while the Government is so well prepared to resist it as now, or until there is apparently more prospect of the Cubans on the island attempting to do something themselves for the establishment of their independence, and to ask of an invasion by their friends in the United States. Until such aid can be effectually given, every expedition from this country must end as disastrously as that which was led by the unfortunate Lopez. Fillibustering will never overthrow the Spanish rule in Cuba. It must be done by a general uprising of the inhabitants themselves, after the manner of the American revolution—and for that it is doubtful whether there is sufficient energy in the people. The climate is too enervating to nourish a very active or persistent patriotism.

> "No rogue e'er felt the halter draw
> With good opinion of the law."

The bunker papers dislike the exposure which has been made of the democratic election frauds in Aroostook,—and, having no possible defence to make, are undertaking to question the authority by which the investigation was ordered. This is not at all surprising.—Rogues are apt to question either the validity of the indictment or the legality of the arrest—and if these are found all right, they sometimes protest against the constitutionality of the law, and go to the penitentiary with an appeal to the public against the outrage upon personal liberty which has been committed by the authorities. The public, however, does not often pay much attention to such complaints—nor will the people do so in the present instance. We apprehend there will not be much fault found with the Governor for instituting an official investigation into the notorious election frauds and outrages committed in Aroostook county last fall. By an *official* investigation only could the facts have been properly proved, and presented to the Legislature as the basis of measures to prevent a repetition of such frauds in future and to maintain the purity of the ballot-box, without which there is no safety for our Republican institutions.

MURDERERS TO BE EXECUTED.—Peter Corrie, Marion Cropps, Henry Gambrill and John H. Cyphus, convicted of murder, are to be executed in Baltimore on the 8th of April.

Isaac Freeland has been sentenced to be hung in Fayette county, Ga., on the 15th of April, for the murder of Claiborne Vaughan.

Mrs. Hartung, for the murder of her husband, and John Wilson for killing Patrick McCarty, have been sentenced to be hung in Albany on Wednesday, the 27th of April.

Henry Jumpertz, the man who murdered his mistress, and packed her body in a barrel, and shipped it to another city; Michael McNamee, for killing his wife; and Michael Fenn, will be executed in Chicago on Friday, the 6th of May.

Bornal, for the murder of a man named Burke, will be hung in Cincinnati, on Friday, the 27th of May.

Besides the above there are two in Pittsburg under sentence of death, and one in Boston.

HON. BENJAMIN WIGGIN was, on Monday last, commissioned as Special Agent of the United States Treasury Department for the Northern District of New England. It is a place of great political importance, and in Mr. Wiggin the President has made an excellent selection for it.—*Bangor Union.*

This is the place to which we alluded a week or two since as having been given by the President to Mr. Wiggin instead of the Fishery Commissionership, which was denied him by the Senate. It doesn't pay quite as well as the latter, but is understood to be "very comfortable," nevertheless. The Union considers it a place of "great political importance." That seems to be so—for it has been used to stop the mouths of at least two hungry political partisans in Maine within the past year, and has therefore proved a very serviceable and "important" place for the party. As to the "excellent selection" which the President has now made,—we suppose the Union's modesty does not allow the editor to specify among Mr. Wiggin's claims for the place, his ownership in and support of the custom-house organ in this city. The main qualification of the present incumbent, however, is undoubtedly his early and remarkable discovery (made while on his way to the Cincinnati Convention) that Mr. Buchanan was a "very great man indeed." Further than this, it cannot be disputed that a man who has displayed such eminent ability in taking care of himself and his political friends, while in public stations, must possess "excellent" qualifications for any place where the pay is good or where there is a chance for the spoils.

LOVEJOY THE SLAVE ADVOCATE.—A person by the name of Lovejoy, who lives in Boston and represents the most stupid wing of the Northern slave-party, has written a long letter and published it in the Washington Union on the blessings and beauties of slavery.—Whether he is bidding for a place of overseer on a Southern plantation or a government office we know not; but he must certainly have had the highest possible inducement for this needless display of his combined depravity and baseness. He knew perfectly well that he was lying when he began his letter, that he lied all the way through, and ended with a lie;—he knew it unless he be of that perfect stupidity that knows nothing.

"What does this blessed Joseph C. Lovejoy who was once (or pretended to be) a clergyman, mean by saying that slavery grows up under the blessing of God? What does he mean by saying it runs through all the Bible? What is the creature bidding for? Does he want an overland mail contract, or a foreign ministry? The stake must be large that could thus induce a Yankee clergyman to go over bodily into the service of the devil.

This virtuous Lovejoy believes in the slave trade and thinks it a praiseworthy and good thing to send slavers to Africa, to buy up human victims, and transport them in deadly hate and fury to the crowd-spotted shores of the "freest nation in the universe." On the whole, Lovejoy must be bidding for the place of a slave-captain on a slaver and we commend him to the careful attention of Mr Lamar of Georgia who has just bought the slave-yacht Wanderer at government auction to send her once more to the Congo river. Or, rather let the blessed Lovejoy, as he is so enthusiastic about the beauties of slavery and says it runs "all through the Bible," try it practically and run it through his ministerial back and belly for a time, will he submit to the dusty chain, the bloody scourge, will he consent to have his children kidnapped and sold and be cheerfully starved on "hoe cake," or if not, he is no true man, but that unmitigated swindler and humbug he plainly must be. At all events, we counsel this same Joseph C. Lovejoy to go south as overseer or on a slaver, it is a disgrace to the old Bay State to hold a person of his opinions within its free boundaries.—*New Bedford Mercury.*

This Lovejoy has a place in the Boston Custom House, which was given him in payment for former "democratic" services of a similar nature with his present letter in defence of slavery. He ought certainly to be promoted by his party, and probably will be. A foreign mission at the least, or perhaps a still fatter "Consul Generalship" would be his reward.

THE AFRICANS.—A correspondent of the Southern Recorder, writing from Jacksonville, gives the following account of the "wandering Africans" who were recently in durance, for some days, at that place:

"The most of these negroes are very likely, and are from six to twenty-one years old; there is only one woman among them. Some of them are quite smart, and all are quick to learn. At first, they could not speak a word of English; several of them, since they have been here, have mastered many words. *Money* and *whiskey* are favorite words with them—all love money, and all appear to love whiskey. They seem to have a knowledge of the value of coin, but none of our paper currency. I gave one an order for something at a store since which time all scraps of paper are in great demand with them. A newspaper was torn into small pieces, and carefully put away, they thinking it will answer the same purpose as money. Their dances and sports are very amusing and original. Most of the older ones are quite ingenious, making knives and other things out of iron hoops and candle boxes. They are very fond of fine dress, and some of the boys of the place have put gay ribands through the holes in their ears, which makes them quite proud."

PRIZES FOR THE YOUNG FOLKS.—The Maine Spectator, the new dollar weekly paper for the young, recently commenced at Rockland, offers an attractive prize of two splendid oil paintings to the largest club of subscribers formed at the regular subscription price, and also a series of prizes to its young readers, for the best compositions, largest clubs, &c. The Spectator is published by Mr. Z. Pope Vose, who is endeavoring to make it a paper which shall meet the wants and promote the education and culture of our youth. The paper looks and reads well, and the enterprise has a just and reasonable claim upon the parents, teachers and youth of our State. The "Stairway," the department of the paper designed to receive communications from its young readers, is meeting with much favor among the boys and girls. Such a paper has certainly better claims upon the people of Maine than the flash literature which floods us from abroad. Send for a copy and judge for yourself.

Fayette M. Ringgold, U. S. Consul at Payta, has written a letter to the Secretary of State, on the whaling interest of this country, in which he states that the results of four year's successful whaling voyage give, to a green hand only $6 25 per month, cash pay, and that ordinarily it amounts to much less.

The citizens of York County, Pa., have established a Company which insures horses from being stolen. The capital of the Company is $100,000.

Turner, who was knocked overboard last fall near Hampden, by the boom of a vessel on which he was a sailor. The body was in a very good state of preservation, and the initials, U. P. T. in India ink on his arm, together with his size and form, sufficiently identified it.

THE RAILROAD BILL.—It will be seen by our special despatch from Augusta, that the Aroostook Railroad bill has passed the Senate by a large majority. It is also rumored that as amended it will receive little or no opposition in the House and will probably be passed.—This is as it should be, and will be hailed with satisfaction by the whole eastern section of the State. The proposition will be submitted to a direct vote of the people in June.

PARDONED.—John Evans of this city, who was tried for breaking into stores in Prospect and Unity, in 1857, and sentenced to year in the State Prison, at the February term of the Supreme Court, has received a pardon from Governor Morrill. FIRE AT OLDTOWN.—Thursday night, about 12 o'clock, a dwelling house opposite the old post office in Oldtown, was discovered to be on fire. The Dirigos were promptly on hand and checked the flames. TANNING WITH A NEW MATERIAL.—Rev. A. Deering, of West Waterville, in a communication to the Maine Farmer, gives an interesting account of a visit to the tannery of Messrs. Russell & Harrington at South China, where sweet fern is used instead of hemlock bark. It is claimed for this new process of manufacturing leather that a better article can be produced at a much cheaper rate, than by the old method. One ton of sweet fern is said to be equal to about four cords of hemlock bark, and costs only about ten dollars a ton, while the average price of bark in this State is about five dollars a cord. Tanneries, too, can be operated at various points where bark could scarcely be had at any price. If all that is claimed for this new process, is true, it is a valuable discovery indeed.

The heavy rain storm of Tuesday afternoon and night caused the snow to disappear very rapidly in this section, still there is a heavy body yet lying apparently undisturbed in the dense forests of our northern country. The river ice is broken up, and this morning—Wednesday—is rapidly passing down the current of the swollen river.—*Farmington Chronicle, 31st.*

SUDDEN DEATH.—Capt. Asa Garcelon, of Lewiston, died suddenly last Monday forenoon, while at work alone in a mill sawing pickets. It is supposed that the saw must in some way, have thrown a piece of board so that it struck his left side, as a rib was found broken just over the heart. He probably started to go out of the mill, as he was found near the door, dead.—*Advocate.*

But no one need wait. Send the money right along by mail. The Legislature has given us a good lift, and we are now quite sure of getting out of debt.

TO THE DAILY WHIG AND COURIER

[Special despatch to the Bangor Daily Whig & Courier.]

Railroad Bill Passed the Senate.

AUGUSTA, April 1.

The Senate has passed the Railroad Bill Amendment—22 to 2. Struck out land to counties. The bill to be submitted to the people on the 2d Monday in June.

The amended bill goes back to the House on Saturday.

WASHINGTON, April 1.

The Navy Department has named the new third class steamers as follows: That at Portsmouth, N. H., the Mohican; at Boston the Narragansett; at Brooklyn the Iroquois; the largest one at Philadelphia the Wyoming, and the smallest one the Pawnee; at Norfolk the Dacotah; at Pensacola the Seminole; at Mare Island, Cal., the Saginaw.

From official advices received to-day, it appears that the steam frigate Minnesota reached Bombay on the 16th of Jan'y, having on board ex minister Reed, who left on the 25th for Suez.

The frigate had visited Singapore and Penang, and several ports in Ceylon.

In a few days she was to leave for Muscat, in Arabia, and passing from there to the Cape of Good Hope she would probably touch at Zanzibar.

A letter from the commander of the U. S. frigate Savannah, dated Vera Cruz, March 11, confirms the former report of the defeat of Miramon and the success of the Constitutionalists in the interior, and their attack on the city of Mexico.

It is probable that Ex Senator Jones will withdraw his declination of the Bogota mission.

There are at least 20 applicants for the vacant Commissionerships of Patents and of Indian Affairs, but the appointments will not be made for a week to come.

The failure of the arrival of the Curracoa with Lord Lyons excites additional fears for his safety.

A despatch from Charleston S. C., says the Courier contains a despatch from Washington that war in Europe has actually commenced; and that George Saunders had brought a despatch to that affect to the President.

Mr. Miles, of Congress, from Charleston, telegraphed back that Lord Napier knew nothing about the truth of the report. The Courier, however, fails to be convinced.

It is well understood that the Cabinet to-day had under consideration the subject of Central American affairs.

Advices from the commander of the Jamestown confirms the recent report of events in Nicaragua.

Our government has nothing from an official source later than the 25th of February, relative to the treaties, when that of Ouseley, of commerce, navigation and transit had been ratified, with an additional article to the effect that Nicaragua surrendered none of her rights over Musquito.

The Musquito treaty was then pending, and the Cass-Yrisarri treaty had not been acted on. Our government will accordingly await further reliable intelligence before it can act decisively.

So far as Great Britain is concerned—If it shall appear that Ouseley has transcended or exceeded his instructions a formal request will be made of England to disavow his acts. If she shall not do so voluntarily, it is thought, however, she will carry out in good faith the understanding between the governments of Great Britain and the United States relative to the settlement of the irritating question growing out of the different interpretations of the Clayton Bulwer treaty; nor is it improbable, should Nicaragua ratify all the British treaties and reject our the minister Lamar, will be withdrawn and Gen Jerez the Nicaraguan minister at Washington be tendered his passports. Such is the position of the question according to the best available information, but much depends on the character of further official advices from Nicaragua. Our vessels will, it is said, be concentrated at the most exposed points.

Items by the California Steamer.

THE ERUPTION OF MAUNA LOA—A SWINDLE IN THE PACIFIC. The correspondent of the N. Y. Tribune gives the following:

We have dates from Honolulu to the 18th of February. The main item of news is that the volcano of Mauna Loa on the island of Hawaii, the largest of the Sandwich group, has broken out in an eruption of unparalleled grandeur. On the mountain side, 10,000 feet above the level of the sea, and 4,000 below the snow-covered summit, the lava bursts out, spurting up like a fountain in jets—sometimes 500 feet high, never less than 25—and then runs in a stream of liquid fire, half a mile wide, 38 miles to the sea, sweeping everything before it.

The missionary ship Morning Star arrived at that place January 2, from Micronesia and islands of the South Sea, and reports the mission work to be doing well. The Morning Star was built in Boston in 1855, at a cost of $12,000, furnished by dime contributions of Sunday-School scholars, and it was supposed that a good vessel was made of her, but a late examination showed that the job was a swindle, her timbers being odds and ends and worthless stuff. One of the newspapers says: "It was proposed to recopper her this time in port previous to dispatching her to the mission in the Marquesas Islands, and in caulking the upper works, preparatory to heaving down, signs of dry rot were discovered about the stern. On stripping off the planking an extraordinary sight was exhibited. She was a perfect cheat, having been neither salted nor ventilated, and her timbers were as rotten as 'punk,' being easily pulled to pieces with the fingers. More than this, she was evidently made up of all sorts of odds and ends—oak being eked out with pine in the most careless, insecure and unworkmanlike manner, and iron-fastened in a devil-may-care style. The only good work about her is the outside planking, which, so far as could be discovered is sound, and well put on, the main idea having apparently been to present a good appearance, and get her to sea. Capt. Brown, the present master of the brig pronounced her, on his arrival here to take charge as much of a "Boston cheat"—and she is, most emphatically. It is estimated that to put her in good condition to go to sea will cost all of $7,000.

ANOTHER AMERICAN VESSEL SEARCHED. A correspondent of the New York Express writes that the American schooner Annette, arrived at San Juan del Norte, Feb'y 24th. While steering for the harbor the British man-of-war Cesar fired a blank shot, brought her to, boarded and searched her for filibusters.

DRY WINE.—A correspondent having inquired what is meant by *dry wine*, it is suggested by a friend at our elbow that the driest kind of wine he ever knew was that imported in *empty bottles*.

"Now, then, where are you driving to?" as the nail said to the hammer.

Carrying the United States Mail.

5th and 20th of each month.

Through Tickets, including transit of the Isthmus via Panama R. R.

CAUTION TO THE PUBLIC.

On account of the numerous frauds and impositions on travelers, those bound to California are cautioned to buy Tickets at the only authorized Agencies of the United States Mail Line, as below.

By order of the Post-master General, the United States Mail Steamers will hereafter be despatched from New York to Aspinwall, on the 5th and 20th of each month.

Passengers are landed at the Railroad Depot, Aspinwall, and conveyed across to the Pacific Steamers *without any extra expense*. This is the only line giving entire Through Tickets, guaranteeing no detention on the Isthmus.

The transit made in *four hours, entirely by daylight*, thus avoiding the great exposure by night, in open boats to fever and ague and 200 miles of dangerous lake and river navigation, over rocks and shoals.

Arrangements have now been completed so that the regular U. S. Pacific Mail Steamer will leave Panama for San Francisco immediately on arrival of the Atlantic Mails and passengers, thus securing passengers by the Mail Line a *sure* and *short* passage, with the greatest comfort and safety to health.

American & Foreign Patents.

R. H. EDDY,
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington under the Act of 1837,
76 State St., opposite Kilby St.,
BOSTON.

AFTER an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France, and other foreign countries. Caveats, Specifications, Bonds, Assignments, and all Papers or Drawings for Patents, executed on liberal terms and with despatch. Researches made into American or Foreign works, to determine the validity or utility of Patents or Inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, of ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional services so moderate. The immense practice of the subscriber during twenty years past has enabled him to accumulate a vast collection of specifications and official decisions relative to patents. These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessity of a journey to Washington, to procure a patent, and the usual great delay there are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the most capable and successful practitioners with whom I have had official intercourse." CHAS. MASON,
Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office." EDMUND BURKE,
Late Commissioner of Patents.

Boston, February 8, 1858.

"Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is now pending. Such unmistakable proof of great talent and ability on his part leads me to recommend all inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges." JOHN TAGGART.

From Sept. 17th, 1857, to June 17th, 1858, the subscriber, in course of his large practice, made on *twice* rejected applications, SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

PERRY DAVIS'

Vegetable Pain Killer!

REV. T. ALLEN, writing from Tavoy, Burmah, says:—Within the past four years I have used and disposed of above five hundred bottles, but am now out. Please send me a fresh supply (through the Mission Rooms) as soon as you can, say two hundred bottles. I dare not be without it myself, and there are endless calls for it, both by Karens and Burmans. I always take it with me into the jungles, and have frequent occasions to use it both on myself and others. One night, while sleeping in an open Zayat, I was awoke by a most excruciating pain in my foot. On examination I found I had been bitten by a Centipede. I immediately applied the Pain Killer, and found instant relief. In less than an hour I was again asleep.

Rev. H. L. Van Meter, of Bassein, India, writes:—Here let me assure you that we prize your Pain Killer very highly. For the first two or three years of our residence in India we were ignorant of its valuable properties, and did not use it, but now would hardly feel safe without it for a single day. Only a few nights since Mrs. Van Meter was stung by a scorpion, and intense pain was instantaneous throughout the arm, and soon a numbness of the fingers followed. By the continued application of the Pain Killer for an hour or more, and at intervals during the night, the alarming symptoms were subdued, and in the morning only a slight soreness was felt in the finger. I gave it in a severe case of Fever and Ague, according to directions, and it acted like a charm, breaking it up at once. The Karens have great confidence in it.

Mr. W. L. Carpenter writes from Calcutta,—"Perry Davis' Vegetable Pain Killer is a very valuable medicine, and most people here that have used it entertain a high opinion of its worth."

Bombay, Dec. 4th, 1857.

Messrs. P. Davis & Son—Gents: We have sold the shipment of Pain Killer per ship Martha, and hope to ship that per Squantum in a few days. Herewith find a draft for £50 on the Mercantile Bank of India, London and China, to your order. Hope to remit you soon the sale of Squantum and Art Union. Yours truly,

Dossabhoy, Merwanjee & Co.

Melbourne, Australia, May 14, 1858.

Messrs. P. Davis & Son—Gents: The "S. H. Talbot," with 64 boxes, and the "State of Maine," with 46 boxes, of your valuable Pain Killer, have arrived, and the Pain Killer is sold at 15s per dozen. Neither of the last are landed yet, but we hope they will be in time for us to forward your account sales and remittance by this mail. These two shipments are divided among four different buyers, two of whom would each have taken the whole (108 boxes) if we would allow it. This is the best statement we can make of your Pain Killer. Send us frequent shipments. NEWALL, HAYMAN & STEVENS.

The Honey Blade Grass.

THE results which have been attained, by experiments in the cultivation of this truly imported species of product, have awakened an interest among the farming classes, in this section, never before equalled in the entire history of our agricultural industry. Facts, in regard to its valuable properties, which at first seemed almost incredible, have now been established beyond the possibility of a doubt, and it is believed, by those best capable of judging of its merits, that its general introduction will add millions of dollars to our agricultural wealth. I have not the space here to enter into details, but will present briefly some of its advantages, &c.

First—It will produce double the weight, the acre, in any soil, of any other kind of grass. From four to six tons per acre is not an uncommon yield, and I am in possession of sworn statements by disinterested and reliable persons, of a yield of over eight tons of good dry hay from a single acre. In soil where it was not possible to get more than one half the amount from any of the common grasses.

Second—The same weight possesses more nutriment, and, consequently, will sell for a larger price in the market, thus insuring the farmer more than double the return from his grounds that he could obtain from any other forage plant. The hay possesses one third more nutriment than timothy, and has sold for $15 per ton, while the price of timothy was but $10 to $12.

Third—Both hay and seed can be produced from the same crop, the hay being equally valuable as other hay after the seed is taken from it, while the seed is as valuable as the best of other grains as a feed for horses, cattle, pigs, chickens, &c., and it is proved to be superior to flaxseed for the manufacture of oil, and must always find a ready sale, at a fair price, for this purpose.

Fourth—It matures in about two months' time, and can be sown on grounds where other crops have failed, either by drouth or other causes, and, at the same time, will yield a large return.

Fifth—In northern climates, where clover and other grasses are destroyed by hard winters, this will yield a large crop, and, in those sections of the South where other grasses will not thrive at all, it will grow very rapidly.

Sixth—It will stand all kinds of weather, and, whether the season be wet or dry, the farmer may always rely upon his *Honey Blade* as a sure crop.

These and other advantages are proved by facts which are endorsed by some of the first agriculturalists of the Union and cannot fail to carry conviction to every intelligent reader.

Having been engaged, during the past year in the purchase and importation of the pure *Honey Blade Seed*, I have determined to offer it for sale on such terms as will make it an object for every farmer and planter to interest himself, during the coming season, in its cultivation. It is put up in uniform bags, of about sixteen pounds each, the amount being sufficient to seed one acre, and the price is $2 per bag, delivered in New York or St. Louis.

Single bags, or less, can be sent to any part of the country as freight or by express, and will be put up, delivered for transportation, and all proper arrangements made, free of charge.

Each bag is stamped with the Hungarian coat of arms, and the following lettering, "*Honey Blade Hungarian Grass Seed.*" It will be sold by agents in various sections, but parties should be careful of whom they purchase, and secure the pure genuine seed; they are especially cautioned not to purchase the common Hungarian Grass Seed, as it is very far inferior to the HONEY BLADE.

An interesting pamphlet, containing all of the facts, and full particulars, will be furnished, free of charge, by me or any of my agents, upon application. I will state, as an indication of the intense interest which the subject is exciting, that nearly a quarter of a million of copies of this pamphlet have already been applied for.

Parties desiring to secure seed should order at once, as the indications are that the limited amount obtained will be exhausted long before the season of sowing has passed. Those who secure seed this year can realize a rich return, by producing seed to supply the demand of farmers and planters for sowing another year.

Orders should be sent directly to me, unless in the vicinity of New York, where they will be filled by J. M. EMERSON & Co., 406 Broadway, New York, General Agents.

Agricultural Houses, General Merchants, and any other parties properly situated, are invited to become agents for the sale of the *Honey Blade Seed*. Authority, full particulars, and from 50 to 100 pamphlets for distribution, will be furnished either by me or the New York Agency, on receipt of 25 cents, to prepay the package.

I am authorized to name the following well-known gentlemen as references: Hon. J. H. Barrett, President of the St. Louis Agricultural and Mechanical Association, Vice President of the National Agricultural Society, and Member of Congress elect from St. Louis; Capt. T. Lincoln, Oxford, Md., President of the National Agricultural Society; John J. Anderson, Banker, St. Louis; John Riggan, Jr., Broker, St. Louis; and ex-Mayor Washington King, St. Louis.
